

Notification - ISBT 128 Labels

The Eye- Bank for Sight Restoration has new tissue labels to reflect the Eye Bank Association of America Medical Standards to include ISBT 128 requirements. Below is a description of how to interpret the new labels.

The following are included on the ISBT 128 label:

Donor Identification Number (DIN) - identifies the tissue donor.

Facility Identification Number (FIN) – identifies the recovery and processing facility.

The Eye- Bank for Sight Restoration has been assigned **W3993**.

Facility Identification Number- Processor (FIN(P)) – Added when tissue is processed at a facility other than the recovery facility.

PRODUCT CODE – identifies the type of tissue and associated processing details.

Common Product Codes for Corneas:

V0003000 = right cornea (for full thickness PK)

V0004000 = left cornea (for full thickness PK)

V0090000 = left cornea processed for Endothelial Keratoplasty (EK)

V0091000 = right cornea processed for EK

V0089000 = left cornea processed for Descemet Membrane Endothelial Keratoplasty (DMEK)

V0092000 = right cornea processed for DMEK

Tissue Description – reflects the product in written form
